Aesther and Ocean Biomedical Announce Shareholder Approval of Business Combination

NEW YORK and PROVIDENCE, R.I., Feb. 6, 2023 – Aesther Healthcare Acquisition Corp (NASDAQ: AEHA) (“Aesther”), a special purpose acquisition company (“SPAC”) and Ocean Biomedical, Inc. (“Ocean”), a next-generation biopharma company, today announced that its stockholders approved all proposals related to the previously announced proposed business combination between Aesther and Ocean at a special meeting of stockholders held on February 3, 2023. A Form 8-K disclosing the full voting results is expected to be filed with the Securities and Exchange Commission.

“I’m pleased that the majority of shareholders have, through their votes in favor of going public, reaffirmed their belief in our vision for the company,” said Dr. Chirinjeev Kathuria, Ocean Biomedical co-founder and Executive Chairman of the Board of Directors. “The business combination with Aesther brings us one step closer to realizing our foremost goals as an innovative life sciences company.”

“The future is unquestionably bright for Ocean Biomedical,” said Suren Ajjarapu, Chairman and CEO of Aesther. “Its efforts to develop a diversified portfolio of medicines and vaccines which the world desperately needs makes its approaching emergence as a public company a genuine victory for patients.”

Unmet Need and Scientific Breakthroughs

Ocean Biomedical is focused solely on catalyzing the clinical development of scientific breakthroughs occurring regularly at premier healthcare research institutions such as Brown University. The company is currently advancing proprietary discoveries which address three critical areas of unmet medical need: oncology, pulmonary fibrosis, and infectious disease. The ability to suppress tumor growth by controlling CHI3L1, a master checkpoint inhibitor, was uncovered by the Ocean team and stands to shift the broader oncology landscape. Various fibrotic diseases may be vulnerable to the effects of the OCF-203 pathway inhibitor Chitinase 1 (Chit1), also identified by Ocean. Finally, Ocean’s proprietary platform for infectious diseases has yielded promising vaccine and therapeutic candidates for malaria. That same platform can, in the future, potentially be utilized against infectious diseases like tuberculosis and pandemic-type viruses.

Notable Investment Activity

Ocean and Aesther have partnered with some of the premier investment institutions in the health care space. This has led to a secure and growing runway to continue Ocean's important innovations, with funding including:

- \$123.9 million in past and ongoing grants, in use to enable first-in-class drug and vaccine candidates that make up Ocean's initial core portfolio in oncology, fibrosis, and infectious disease, all based on new target discoveries
- A \$40 million committed backstop by Vellar Opportunity Fund SPV LLC – Series 3
- A Common Stock Purchase Agreement with White Lion Capital LLC, which provides that White Lion Capital is committed to purchase the company's Common Stock with an aggregate gross purchase price of up to \$75 million
